COME PLAY IN THE WORKING FOREST

Welcome to forest lands managed by Western Forest Products. These forests are an integral part of our local communities and they are busy year round with forest management activities.

We manage a large network of logging roads that provide access to many beautiful sights and recreational opportunities. Amazing adventures await, we wish you safe and happy travels!

TIPS FOR BACKROAD TRAVEL

- Expect to be sharing these roads with heavy equipment and logging trucks.
  - » Stay calm and pull over immediately so logging trucks can pass.
  - » Back up if necessary. Logging trucks cannot pull-over.
  - » Wait patiently for the dust to settle before continuing at safe speeds.
- Drive with headlights on
- Expect to navigate independently, there may be no directional signs.
- Expect rough surfaces, potholes, and in the case of deactivated roads, cross ditches.
- Cell phone service is unavailable outside of main communities.
- Be prepared – supplies should include food and water, a first aid kit, warm clothes, a full tank of fuel and a spare tire.
- Let someone know where you are heading and when you expect to return.
